Strut mount to fit **BMW E32, E34**

Customers brought to our attention that the rear strut mounts of the BMW 5 and 7 series were in need of the special MEYLE touch. Our developers have come up with that new special version. The high demand for this part results in the original design where the middle bushing frees itself from the rubber due to dynamic stress.

Rubber-to-metal compounds react critically to tensile and axial load - MEYLE designed the inner bushing in such a way that the binding surfaces of the rubber to metal come under strain from pressure only.

Comparative tests have revealed a far longer working life. We are convinced that you have replaced this part on your vehicle for the last time.

This guarantees:

MEYLE - Miles in Motion
